## Danny Bow - Frozen Memories

netlabel - [export label](#)

genre - electronic, trip-hop, instrumental hip-hop

release date - 2010

It is our pleasure to introduce export label new representative - Danny Bow. A character known previously as Enbe, present on the music scene for few years now. His last album which was warmly welcomed, the "Theory of Jazz" released in 2007 by 16wersów label, still has a group of loyal and regular listeners. After longer absence the artist returns with altered profile. Hiding behind new nickname he takes up music themes which until now weren't present in his quests. He expresses that in seventeen premiere tracks comprising "Frozen Memories" album.

The sounds of „Frozen Memories" create strong, continuous lines out of shraged single point. Sometimes by being abruptly broken off they push the listener into the feeling of insatiability, but after a while they compensate it with thick, intense tone. The other tracks from this album emphasize the rush of the world in all its forms, or build its complex structure. By the dialogues interspersed throughout the melodies, Danny Bow expresses his opinion on music and topics that concerns it.

## Footprints 16 - Diggin Europe: The Mission 60'-80'

genre - jazz, funk, electronic, mix  
release date - 2010

Diggin Europe: The Mission 60'-80'" mix is a collage of European recordings dating from 1960-1980, oscillating between such genres as Jazz, Big Beat, Funk, Electronic, Psychedelic and Rock music. Unlike two previous mixes containing some recordings of Polish artists signed with Muza Polskie Nagrania and Pronit, this one joins musical pieces of European artists from Hungary, Czechoslovakia, Germany, Russia, Romania, Portugal, France. The 68 pieces used in the mix were carefully selected out of nearly one thousand vinyl records released in the Old Continent over the decades. The idea behind "Diggin Europe: The Mission 60'-80'" is to show the identity of European music dating from the developmentally significant and simply the best times for the music itself. ## **Zambon & Pnk. Discorp - The Very Polish Cut Outs Mixtape 01**

label - [the very polish cut outs](#)

genre - nudisco, mix, remix, electronic

release date - 2010

First mix in the series. Only edited polish music from the 70s & 80s selected & mixed by Zambon & Pnk.Discorp. The Idea behind The Very Polish Cut-Outs is very simple - we want to promote Polish music all over the world through releasing different compilations, mixes and by putting it in a new context through editing - lately one of the most common way of recycling music. On this site you will find lots of dusty grooves, obscure sounds and sometimes very hard to find gems that were recorded in Poland back in the days. Take your time and enjoy the trip trough the wastelands of Polish music. [polishcutouts.wordpress.com](http://polishcutouts.wordpress.com)

## Asheville Beat Tape Vol. 1

label - lab coat  
 genre - instrumental hip-hop, abstrackt hip-hop,  
 electronic

**release date - 2010**

The idea for an Asheville Beat Tape came from Nigel One, a long-time DJ and producer who has been involved in Asheville's electronic music scene since the early 2000's. Soon after joining forces with Skew Records, Nigel decided to spearhead the idea of bringing some of the surrounding talent together to form an Asheville Beat Tape. After a month's time, Nigel had collected a multitude of tracks from area producers, and brought on Skew producers Peripheral and DM Stair to help artfully and seamlessly arrange the tracks into order. The result is a 45-minute mix of inspiring production and composition styles.

**Freethebeats vol.2**

**genre - instrumental hip-hop, electronic**

**release date - 2010**

Free the beats is a project aimed at releasing bedroom beats that would not otherwise see the light of day as a free compilation once every three months.

Covering a range of styles and approaches to beat making the one theme drums.

Beat heads, and underground crate diggers who love their synths and dusty samples lock themselves away to produce a multitude of tracks that range from dubstep and glitchy electronica to down tempo instrumental hiphop and ambient beats.

The project is focussed around a DIY attitude. 100 Cd's burnt from home are bound in carefully constructed cases made from recycled materials and are a limited edition artwork in themselves. The cd's are given out for free and distributed in local record stores, sent to radio etc. Once the discs are gone thats it!

Themes found in the materials used to make the cases will be given to contributing artists and interpreted musically.
